

How to make a virtual impression and do a good interview

Some guidelines for candidates

Ensure you can access the platform (Skype/Zoom/Teams) that will be used for the interview.

Test your camera, microphone and speakers.

Choose a quiet location, with good lighting for the interview – have your light source in front of you.

Present yourself well – business casual does not mean casual!

Minimise potential distractions to ensure you can stay focused during the interview and minimise any background distractions.

Prepare as you would for an in-person interview.
